**Subject:** RE: New Request for Documents - Upper Animas Mining District Area

Hi Jon,

It looks like there was a mix up in data and PDFs. I hope my explanation below sheds some light on the "missing" files.

The Upper Animas Cement Creek index (it was sent out by someone else in March or April) is comprised of documents from at least two separate sites: the Upper Animas and the Upper Cement Creek sites. Some of the documents are already in your possession as they were on either the Upper Animas or Upper Cement Creek index (which I sent out), some are waiting on Paula's review and most of them are data packages. There are also a few privileged records that should not have been on the list. The Record Center will not provide those to you.

I added a "COMMENTS" column to the Upper Animas Cement Creek index to note information regarding the documents on the list. Please note: UA = Upper Animas, UCC= Upper Cement Creek. Some of the documents say UA DUP or UCC and that indicates the file is listed on a different index I supplied and is either in your possession or being reviewed.

The Record Center was told you would get the data packages (raw data that has not been analyzed) from Scribe. Anything with the terms "Data Package(s)," "Chain of Custody,"(COC) "Data Quality Assurance Review," "Complete Sample Delivery Group" or "SDG" is a data package. They are highlighted in yellow one each spreadsheet.

My comments are in red regarding the documents the Record Center still owes CB&I:

- Durango Copper Smelter - 8 files Four of the files are data packages. The Record Center will provide the remaining four files.
- Durango Lead Smelter - 4 files Two of the files are data packages. The Record Center will provide the remaining two files.
- Red and Bonita Mine - 2 files Both files are data packages.
- Upper Animas Cement Creek – 142 files The majority of the documents are data packages, duplicates of other indices, privileged, or CB&I determined they were not needed on a different spreadsheet. The Record Center shows 3 documents which are currently under review by Paula. We will provide those after they are scanned.
- Upper Cement Creek - 42 docs 15 files are data packages, 26 are duplicated in the Upper Animas folder and the Record Center will provide the remaining file.
- Upper Animas Mining District - 42 file 41 files are data packages. The Record Center will provide the remaining file.
- Rose and Walsh Brownfields – 6 files All six of the files are data packages.

My apologies for missing the remaining documents on the first round. There are only nine of them. I will look tomorrow and see if it is feasible to send them via email.

I have attached "RRC REVISED" indices that will give details on what is a data package, duplicated or what we need to get to you.

Please don't hesitate to call with any questions.

Thank you for your patience!

**Subject:** New Request for Documents - Upper Animas Mining District Area

Hi Shawna,

Thank you for the document files that I collected last Thursday. I've completed a review of what files were originally requested vs. what files were provided and there are a few files that we haven't yet received. Here's a summary of what we still need:

- Durango Copper Smelter - 8 files
- Durango Lead Smelter - 4 files
- Red and Bonita Mine - 2 files
- Upper Animas Cement Creek – 142 files
- Upper Cement Creek - 42 docs
- Upper Animas Mining District - 42 files
- Rose and Walsh Brownfields – 6 files

Excel lists are attached for each bullet listed above. I've hidden the files we don't need in each spreadsheet. The unscanned files you mentioned in your previous email (below), are not included in the above lists.

Thanks again for your help so far.

Jon

**Subject:** RE: Request for Documents - Upper Animas Mining District Area Lists Attached

Good morning!

Just an update for everyone: The documents requested by CB&I are loaded onto CB&I's external hard drives and ready to be returned to Jon.

I left Jon a message and anticipate hearing from him sometime today.

The 27 documents for Upper Animas that Paula requested to review before scanning are ready.

Please let me know if you have any questions or if you need anything else.

Thank you!

**Subject:** FW: Request for Documents - Upper Animas Mining District Area Lists Attached

Good morning!

Per Dave Christenson's request, I have attached revised indices showing only 0-image documents minus data packages and chain of custody letters; the rest have been hidden. Please take a look and let us know if any of the 0-image documents are relevant to you. The Records Center will need more time to get these documents to you because they are located off site and will need to be scanned.

Please note there are five indices attached because the Mogul/Grand Mogul Mines and Red and Bonita documents are all scanned except for data packages.

The Records Center will have the previously scanned documents ready this week barring any technical complications.

Please let me know if you have any questions or if you need anything else. Thank you!

**Subject:** Request for Documents - Upper Animas Mining District Area Lists Attached

Hi Dave,

Hope you've been doing well.

CB&I is requesting copies of documents from 7 of the 11 lists you provided last month (see email below). Please see attached (7 files). Two of the lists (Upper Animas Mining District and Upper Cement Creek) have been revised and the number of documents reduced - we hid the rows on these Excel files for the documents we don't need and the total number of documents in each list is included in each Excel file name. How long do you expect it will take to compile these documents?

Thanks for your help!

**Subject:** RE: Final List of SEMS Sites from CERCLIS for Upper Animas area - Request for Document Lists

Here are lists of releasable records in SDMS for the sites you listed. Note that these spreadsheets have 2 worksheets/ tabs. The "Search HitList" tab will be the one of most interest. The "with transfer and tracking info" tab is a finding aid for Records Center use, in the event that you request a particular document.

#### Column label explanations

- "Doc ID" is a unique identifier for each record in the SDMS application
- "Images" means the number of scanned pages in a PDF file in the SDMS system. It should be fairly straight forward to make & provide to you electronic copies of those documents. "0" in the images column means the document has not been scanned, and in most cases, we have sent those documents to off-site storage. It would take a bit longer to get those documents, and in general, we'd prefer to scan them & provide electronic copies, rather than making originals available. Depending on volume, we can usually retrieve off-site documents in a week or two.

Let me know if you need any specific documents.

Dave,

Thanks for confirming receipt of the email below with me on the phone today. Sounds like you'll have the lists for us early next week for the releasable information. Please feel free to stagger

information to us as you have it available if that's more convenient than providing all the data at once.

Thanks again,

**Subject:** Final List of SEMS Sites from CERCLIS for Upper Animas area - Request for Document Lists

Hi Dave,

Attached is our revised and final list of SEMS/CERCLIS sites. Can we please obtain an index (list of all electronic site documents) for these 11 sites? 9 are in San Juan County and 2 are in La Plata County. We added one more "yes" (Barkers Park Mill) and took two "yes" sites off our original list that I sent you yesterday (Durango Assay Chemical and Durango Detox mercury spill). We also confirmed the rest of the "?" on yesterday's version as "no".

Could you please confirm you received the attachment and let me know if you have any questions? Also, any idea when we might be able to receive the document lists from you?

Thank you,

Jon Vail

**Subject:** List of Sites in CERCLIS for Upper Animas

Dianna – Please respond to all as I will be out of the office next week (May 26-30) and may not be able to respond to email quickly. For the Upper Animas, the remedial program has an IA with USACE and their contractor, CB&I to gather and organize data that has been collected in the Upper Animas watershed as a “prelude” to the scoping of an RI.

Towards that effort, CB&I and the Superfund Records Center need to know all “sites” in CERCLIS that may be applicable to this task to search for data and the supporting documentation (lab reports, QAPPs, Sampling Results Reports, etc.). Can you search CERCLIS for all “sites” in both San Juan County and La Plata County, Colorado? The reason for La Plata County is that we have started sampling downstream of Silverton along the Animas River as far as Durango which is in La Plata County.

If you have any questions on this request and I’m not available, Richard Sisk may be able to assist you. I will be in the office for awhile tomorrow AM (Friday, May 22<sup>nd</sup>). Thank you.
